

VIRTUAL EXHIBITION BOOTH

What is a Virtual Exhibition Booth?

A Virtual Exhibition Booth is a digital version of a brick-and-mortar exhibition booth. We present it as a web-based application where a 3D model of an exhibition facility for a company is displayed in a web browser. The various offerings of the company are presented in the form of 3D models, 2D images, and information brochures. The user can literally experience a walk-through in the booth and also can interact with the displayed items to get detailed views in the form of instruction manuals, detailed 3D models, 360-degree view of items and animations.

Why a Virtual Exhibition booth?

A virtual Exhibition booth can be made available 24X7 and throughout the year as against a real exhibition which is for a short duration. A visitor can get all the minute details of the offerings in a digital, interactable, multilingual, and easy-to-understand form.

Where the recent pandemic has made it extremely difficult to hold real exhibitions, virtual exhibitions have proved to be a safe, secure, and flexible alternative to real exhibitions. A Virtual Exhibition Booth has become a reliable tool in the marketing efforts of companies in the current situation.

Salient features of a Virtual Exhibition Booth

- 1) Remote accessibility due to Web-based application
- 2) 24X7 availability
- 3) Better experience in the form of 3D models and 360-degree views
- 4) Better understanding using 3D animations, flow animations, visual effects, voiceover, etc.
- 5) Availability in a multilingual form
- 6) Advanced presentation in the form of state-of-the-art technologies like augmented reality, virtual reality and mixed reality
